# How To Maximize Your Profits And Turn ADZbuzz Into A Full-Time Online Business

with the help of

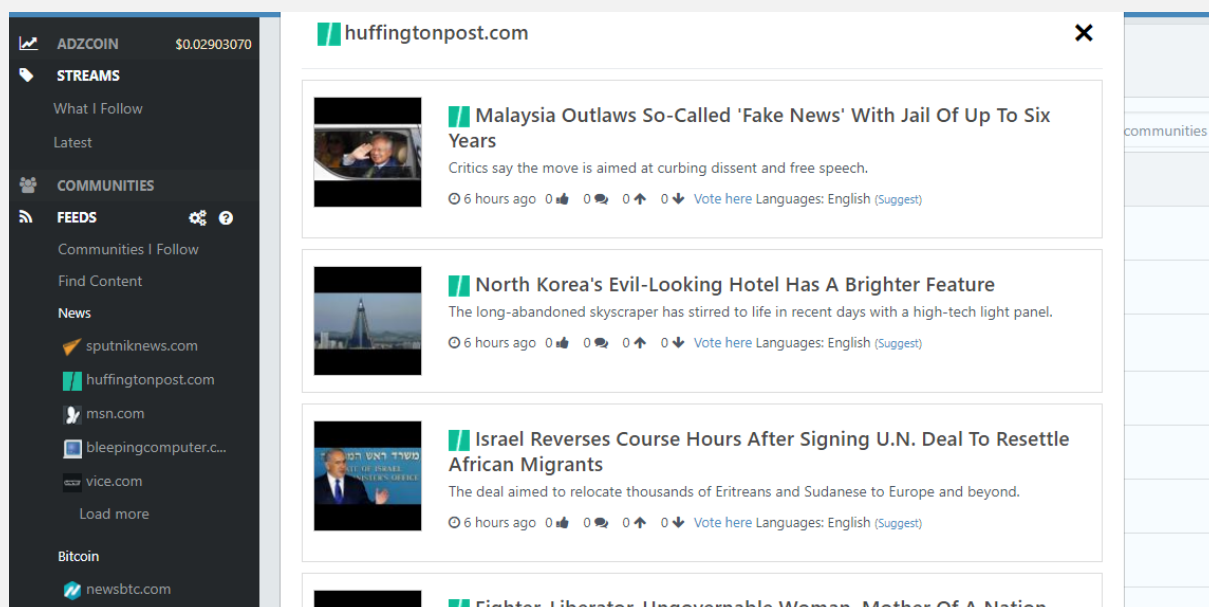

## ADZbuzz Community Tokens

ERC20 Tokens, Built on Ethereum, Traded on ADZbuzz Exchange, that Earn their Owners Daily Dividends too.

## Introduction – What is ADZbuzz About?

ADZbuzz is a content discovery platform with a built-in RSS reader that allows you to follow and organize your favorite sites and easily read their latest content. The content is posted on ADZbuzz in streams which you can organize in feeds (categories) in order to easily discover the content of sites you like.

With the click of a button you can see all the latest posts of the sites you have added in your feeds, ensuring you don't have to navigate to all the different sites one by one.

All sites on ADZbuzz have their very own community and the interesting thing is that ADZbuzz shares 90% of its profits from various income streams with both the publishers who create the content and the ADZbuzz member who owns the community.

Ownership in ADZbuzz communities is represented by ERC20 tokens which are built on top of the Ethereum blockchain. People that hold these tokens are in fact the owners of that communities and receive part or all the earnings that community generates every day.

Own [ADZbuzz Communities](#), Build Assets that Pays Daily Dividends

These tokens not only generate profits for people holding them but can also be bought and sold on the ADZbuzz Exchange. Because of the fact they earn daily dividends for holders, these tokens have intrinsic value and can potentially grow in value over time.

So essentially, as ADZbuzz sends more visitors to publishers' websites and adds an extra income stream to their websites 100% hands-free, you can turn ADZbuzz into a full-time online business by claiming more and more ownership in ADZbuzz communities and increase your daily profits as well as the value of assets you hold.

In this guide you'll learn exactly how you can do that and how you can speed up the process to make more and more money every single day on ADZbuzz.

## Tokenized and Untokenized Communities

ADZbuzz makes a distinction between tokenized and untokenized communities. Tokenized communities are represented by ERC20 tokens and untokenized communities are represented by ownership percentage.

On the own a community page there are 2 tabs where you can claim either tokenized or untokenized communities.

Every day ADZbuzz creates more and more tokens, so while you claim untokenized communities, these will be represented by real tokens in the future.

As for the earnings, there is no distinction between tokenized and untokenized communities. Both earn the same way from the daily profit share using several dynamic specifications determined by our algorithm to determine the popularity of the community.

Here is a short overview of how you can claim tokens in both tabs:

### Tokenized Communities

- Use daily login bonus (100 tokens a day)
- Use referral program earnings (10 tokens for every referral that claims his 100 free daily tokens)
- Buy tokens on the ADZbuzz Exchange

### Untokenized Communities

- Use Rebates from trading on the ADZbuzz Exchange (50% of trading fees is added to bonus wallet the moment you make a trade)
- Use Neobux referral commissions (\$0.01 per click is added to your bonus wallet once a week)

In this quick start guide we'll go over all options to claim tokens in detail and explain how you can grow the value of the assets you hold.

### ✓ Earn Bonus Wallet Credits By Clicking On Ads In Neobux

An extra feature we have integrated into the ADZbuzz platform is the option to earn bonus wallet credits using Neobux. This is a PTC site where you can click ads and earn every day.

Every click will result in \$0.01 being added to your bonus wallet which can be used to claim ownership in untokenized communities. *Here is how that works:*

- Join Neobux using [This Link](#)
- Add your Neobux username on [this page](#)
- Click on the orange ads once a day (pink or other ads don't qualify)

Own [ADZbuzz Communities](#), Build Assets that Pays Daily Dividends

Once a week your earnings will be added to your bonus wallet and allow you to claim ownership in untokenized communities, same as with the rebate from trading fees on the ADZbuzz Exchange.

Please mind the rules of Neobux to not get banned. Please refer their website for complete rules but for your idea these are

- Only get one account
- Use only 1 computer
- Only use one IP address (don't click ads if you're not in the house)
- Don't use Proxies
- Don't click ads from mobile devices
- Don't try to cheat the system

When their rules are respected you will be able to claim more and more ownership in ADZbuzz Communities and grow your daily profits.

### ✓ **Grow The Value Of Your Assets**

The value of community tokens are determined by the daily dividends they earn by holding them. The more followers the community has, the higher the probability they will earn more.

That is why it's a good idea to acquire lifelong ad credits in order to advertise your communities inside the ADZbuzz network. This will help for other members to discover your communities, join them and increase your daily profits and the value of the assets you hold.

So how does the ad credits system work on ADZbuzz?

- The total supply of ADZcoin will be 84 million
- Ad credits can be acquired by burning ADZcoins
- Ad credits get an even amount of ad impressions based on how many you hold

So to give an example, consider a hypothetical case:

- You own 10,000 ad credits
- There are 15 million ad credits in the ad server (not all ADZcoins are in the ad server)
- ADZbuzz generates 10 million ad impressions per day
- Your ads will be seen 6,666 times every single day!

With a conversion rate of even less than 1% there can be over 50 people joining your communities every day in this scenario, gradually growing your daily profits and the value of the community tokens you hold.

### So how do you acquire ad credits?

There are two options:

#### 1. Use your daily earnings

Daily dividends on ADZbuzz are paid in ADZcoin and even though you can exchange your ADZcoins for every cryptocurrency that trades on the ADZbuzz Exchange, you can also instantly burn them and turn them into lifelong ad credits.
