Abstract

The crypto market has seen an explosive growth at the end of 2017. The daily trading volume of top crypto exchanges has reached billions of Dollars allowing these businesses to earn millions of Dollars every day in trading fees. The ADZbuzz Exchange in combination with the social content discovery platform ADZbuzz aims to reward web publishers and crypto traders using profits from various sources. This will not only allow crypto traders to earn daily coins just for trading on the exchange, but will also help web publishers to earn a passive income in crypto, increasing the mainstream adoption of cryptocurrencies in general.

About ADZbuzz

ADZbuzz is a social content discovery platform with a built-in RSS reader. On top of getting more followers and readers for their content, publishers also receive daily crypto rewards as more and more people read their content. The platform has been built from the ground up for the last 2.5 years and now includes dozens of features that allow us to compete with the established social networks.

The screenshot displays the ADZbuzz Gold interface. About ADZcoin

Web Publishers and crypto Traders are rewarded daily with ADZcoins, a cryptocurrency that represents the ad space on ADZbuzz. All ADZcoin holders have the choice to exchange their ADZcoins for permanent ad space on the ADZbuzz network. In order to do so they need to burn their coins, something which continuously lowers the supply of the coin. On February 16, 2018, a grand total of 14.77 million ADZcoins have been burned so far of a total limited supply of just 84 million coins.

All of this can be verified on the ADZcoin block explorer [here](#).

Once the coins are burned they are turned into lifelong ad credits on the ADZbuzz platform and can be used by publishers and advertisers to promote content and services in the ADZbuzz ad server.

About The ADZcoin Buyback Program

90% of the daily profits ADZbuzz generates is used to buy ADZcoins on the ADZbuzz Exchange.

- ➔ 50% of those ADZcoins are used for the daily profit share
- ➔ 50% of those ADZcoins are burned and turned into permanent ad space for the ADZbuzz project

Trade On The [ADZbuzz Exchange](#), Earn Daily Coins For Life.

As a result, ADZbuzz will be buying back its ad space which can be used to promote products and services and further increase the company revenue which is then used for the daily profit share. This gives the burning of coins two benefits:

- ➔ It further lowers the total ADZcoin supply
- ➔ It further increases the ADZcoin demand

As the profits of the ADZbuzz project grow, so will the demand and the amount of ADZcoins that are burned on a daily basis.

ADZbuzz Income Streams

The daily profit share on ADZbuzz, which allows web publishers and crypto traders to earn daily coins, comes from various sources of income on the ADZbuzz platform.

Here is an overview of all the income streams that are already live, and those which are in development phase:

- ➔ ADZbuzz Ad Space Monetization – Affiliate Commissions
- ➔ ADZbuzz Services – Fiverr Marketplace Earning 20% Per Sale

- ➔ ADZbuzz Savers Price Comparison Site – Affiliate Commissions
- ➔ ADZbuzz Titan – Micro-Job Website Earning From Various Sources
- ➔ Other Ad Sales – Direct Sales

ADZbuzz is a platform with an enormous monetization potential. We firmly believe that compared to competing crypto exchanges that offer a reward system, the earning potential on the ADZbuzz Exchange will be much higher as the project grows over time.

About ADZbuzz Communities

Every website can have a community on ADZbuzz. This can be considered a web 2.0 property which contains the content of the site. If the site has RSS enabled the content will appear automatically in the community so readers can easily browse all the content of all their favorite sites.

ADZbuzz communities have intrinsic value because they generate profits for the owner. Just like any regular website that earns revenue, an ADZbuzz community is an asset that can be bought and sold. The more members the community has and the more traffic it generates for the publisher, the higher the daily rewards will be for both the publisher and the community owner.

About The ADZbuzz Exchange

At the heart of the ADZbuzz project lies the ADZbuzz Exchange. Built from the ground up and tested for performance and security for several months, the ADZbuzz exchange aims to form a bridge between mainstream publishers and the cryptocurrency world.

All aspects to make an exchange work flawlessly have been examined and implemented. Building the crypto environment inside a social network has been a challenging but highly educational experience for our team for several years, and all traders can be assured that all operational and security elements have been put into place to allow safe trading.

Our main security policy is that there are never funds in so called “hot wallets.” We keep 100% of your funds in encrypted offline wallets which are backed up in cold storage on a daily basis. On top of that we have a multi-level automated security system built in as well as a double manual verification before any funds are being withdrawn.

Here you can see the UI Interface:

We kept the user interface easy and simple to use, Something really appreciated by our dozens of beta testers.

About The ADZbuzz Exchange Bonus

The unique feature of the ADZbuzz Exchange is the option for traders to get a 100% rebate on their trading fees in their bonus wallet and a 50% rebate when their referrals trade. This bonus is reflected in USD at the current exchange rate of the coin the trading fee is received in by ADZbuzz.

Important: There is no need to buy any coin to earn this rebate. All that is required to instantly get the rebate is to trade on the ADZbuzz Exchange and the rebate will automatically be reflected in your ADZbuzz bonus wallet.

Money in the bonus wallet can be used to acquire shares in communities on the ADZbuzz platform, allowing traders to claim ownership over communities. These communities will allow traders to earn extra coins in 3 ways:

- ➔ **Earn coins accumulated for the owner of that community** – This bonus is instantly sent to the earnings wallet and can be withdrawn instantly. This can be done the very moment you made a trade.
- ➔ **Earn daily coins from the profit share on ADZbuzz** – This bonus can be withdrawn after 30 days every day and earn traders a passive income forever.
- ➔ **Sell the share in the community** – The share you own can be resold to other traders later on in a “Flippa-Like” marketplace – After sale the coins will be instantly sent to the wallet of the coin of your choice.

Here is an overview of how much traders will earn as a rebate on trading fees in their bonus wallet based on the total amount of trading fees earned by the ADZbuzz Exchange:

- ➔ First \$1 Million Trading Fees: 100% Rebate
- ➔ \$1-\$10 Million Trading Fees: 50% Rebate
- ➔ \$10-\$100 Million Trading Fees: 20% Rebate
- ➔ \$100 Million+ Trading Fees: 10% Rebate

Bonus wallet credits can be used to claim ownership in communities on ADZbuzz. You can find a clear tutorial on how that works exactly [here](#).

And here you can see a preview of the page where you can claim ownership of ADZbuzz Communities using your bonus wallet earnings:

ADZbuzz is able to offer a 100% rebate initially (and 50% to referrers) because the value of communities lies in their creation. As soon as a community is created on ADZbuzz it needs to be purchased for \$100 (non-gold members) or \$75 (Gold members) using money or bonus wallet earnings. People start engaging with the content of the community the moment it's created and posts appear in the stream on ADZbuzz making the community earn daily coins for the publishers and owners.

ADZbuzz Exchange Referral Program

Referring others to the ADZbuzz Exchange is also beneficial as you will also get a rebate on their trading fees. This is half of what you get for trading yourself and will be awarded like this:

- ➔ First \$1 Million Trading Fees: 50% Rebate
- ➔ \$1-\$10 Million Trading Fees: 25% Rebate
- ➔ \$10-\$100 Million Trading Fees: 10% Rebate
- ➔ \$100 Million+ Trading Fees: 5% Rebate

There is no limit as to how many people you can refer to the ADZbuzz Exchange.

Final Word

ADZbuzz in combination with ADZcoin and the ADZbuzz Exchange has created a unique system that will help millions of people around the globe. Unlike other exchanges who give away millions of Dollars in value to a couple of lucky winners, we aim to give everybody that trades on the ADZbuzz exchange along with the web publishers the opportunity to grow their daily coins and increase their portfolio of valuable assets they hold.

Secondly our ultimate goal is to make cryptocurrency go fully mainstream by introducing them to the people that shape the face of the internet, namely the content creators. They now have the opportunity to earn cryptocurrencies on ADZbuzz every single day, something that can complement their daily earnings from advertisements or product sales.

If we are able to make mainstream publishers enthusiastic about cryptocurrencies, we are one step closer to achieving a complete cryptocurrency revolution as these mainstream publishers can reach everybody online.

In that sense, we firmly believe that ADZbuzz can become the catalyst platform which will teach billions of people worldwide about all the benefits cryptocurrencies have to offer.
